

# DuraPack bundle

## Simplifies the installation of FTTx networks

DuraPack is the bundle of microducts DuraMicro DI which are preinstalled in the duct made of high density polyethylene (HDPE). The main duct itself has smooth inner and outer surface with inner layer of permanent sliding material Silicore™ with a very low coefficient of friction.

This preinstalled solution gives you very high flexibility of configuration and extra speed of deployment in greenfield.

## Features & Benefits

Proven efficiency in cable networking

Very high flexibility of your network configuration – combinations on request

Minimizing deployment time and installation cost

The best solution for microduct protection and blowing performance

Effectively used duct space – higher filling ratio compared with blowing

Loose microducts – no problem with Pi effect

## Accessories & Tools

- Connectors , Reducers ,End Plugs
- Waterblocks or Gasblocks
- Branching enclosures
- Microduct shears
- Longitudinal cutter
- Deburring tool
- Pulling grips, Lubricant
